
COCO small/medium/large = area < 32^2, 32^2-96^2, > 96^2 px; the same thresholds are applied to KITTI boxes. KITTI AP_S/M/L is over the 5 mapped classes, COCO over 80 classes. OWLv2 and Grounding DINO-T COCO numbers are on a seeded 1000-image val2017 subset (the others use all 5000).
